”Steps Forward on MOC and Making Changes to MOC

PAMED and the PAMED Delegation to the AMA are committed to further educating our physician colleagues on matters related to the ABIM and MOC as we support AMA, state and specialty efforts to create a continuous professional development process that works for all physicians.

On June 13th we invite you to hear a distinguished group of panelists who will present their work and their views on MOC, including their insights on ABIM, as we continue to frame the issues that need to be addressed to change MOC.
